Subject: RE: DPH Data / phones

My only concern would be that there is a data jack available in each space that may house a body and/or PC, plus one or two to allow for networked printing.

Subject: DPH Data / phones

Graeme and Bob,

I will not be able to meet at 1:30 today. I didn't realize my boys have an orthodontist appointment I need to bring them to. What I was hoping to achieve at the meeting was to resolve separation of phone jacks from data jacks. I forwarded the attached plan earlier for your use.

It appears to me all we have to do is...

1. Pull data out of three jacks in 251A.
2. Pull phone / fax into those jacks as the phone number show on the attached plan.
3. Add one phone jack in 247A.
4. Add one phone jack in 247.

If I am missing something please let me know. You can reach me this afternoon on my cell if you need me.

Thanks,

Stephen
